CAREFUL PLANT GROWERS

Certificate of Nursery Inspection

To Whom It May Concern:

THIS IS TO CERTIFY, That on the 30th day of August, 1915, we examined the Nursery Stock of A. L. Vincent and U. G. Hawk growing in their nurseries at Salisbury, County of Wicomico, State of Maryland, in accordance with the laws of Maryland, 1898, Chapter 289, Section 58, and that said nurseries and premises are apparently free, so far as can be determined by inspection, from the San Jose Scale, Peach Yellows, Pear Blight and other dangerously injurious insect pests and plant diseases.

This certificate is invalid after August 1, 1916, and does not include nursery stock not grown within this State, unless such Stock is previously covered by certificate and accepted by the State Entomologist and State Pathologist.

Thomas B. Symons, State Entomologist.

J. B. S. Norton, State Pathologist.

College Park, Md., Sept. 8, 1915.

MAR 15 1916

STRAWBERRIES.

Are the most profitable of all small fruits grown in the U. S. The returns from growing strawberries are the foundation of all crops that follow and puts the first dollars in your pockets.

Build your own monument of success by laying the foundation with returns from growing strawberries. Our plants will make your success sure, because we make an honest and conscientious effort to grow plants as good as any grower. Our soil is ideal clay loam which insures bright, strong roots and crowns.

We set, hoe and cultivate our own plants. We don't trust the care of them to the fellow who tends them for so much an acre.

We fresh dig all plants to fill all orders. In doing so you get them in a fresh state.

Often times the weather conditions cause a delay. Such delays are of short duration in these parts. The weather is the only cause for delay in filling your order promptly by us.

Our plants to set are first grown in a Budding bed. Selecting plants for that purpose show the best bearing qualities, vigor and stamina. Also insuring them True to name.

We publish no cuts or hot air. Often times you will see plants advertised in a steam roller, highly glossed catalog, telling you that there are no other plant growers but the Party sending you fancy literature filled with cuts of Berries magnified many times and a long list of testimonials, that they are the best in the Biz.

We claim there is one more plant grower—**THAT'S US.** A trial of our plants will con-

vince you and we don't charge you as much for your plants.

We appreciate the letters written to us by our customers, but decline to publish them. In case you desire any reference, kindly write us and we will refer you to a nearby satisfied customer who is probably your neighbor.

Plants grown here are better than those grown in the South or Far North. On this natural strawberry climate the atmospheric conditions are such that don't exist in other parts, which enable us to grow our plants in the open without mulching them to protect them from cold. Naturally plants grown under such conditions are hardy and more productive of large and firmer berries. Northern grown seed yields better crops. It is so with Berry Plants.

We caution you to use care when you receive your plants. Often times plants are carelessly treated in unpacking. It is the duty of the party opening package to select a cool place. Lay the top layers of moss on the ground, dip roots in water, placing plants on moss, crowns up. Repeat with every layer of plants. It will keep them fresh. When ready to set plants cut off ends of roots, dip in water, then set.

The careful grower has the best success.

We sometimes make mistakes. When we do, we are ready and willing to make good our mistakes.

We thank you for your orders and for recommending our plants to your friends. Wishing you much success, we are

Very truly yours,

A. L. VINCENT

U. G. HAWK

Over all the land the Thoroughgood Strawberry Plants grow.

We dig fresh all plants to fill all orders.
We don't ship you storage plants.

We use live moss to pack our plants.

I, the undersigned, came here from Plant City, Florida, for the purpose of growing plants principally for Florida berry growers.

Knowing the conditions better than the average plant grower and your needs for success, I will do my utmost to send you Thoroughgood Plants and will personally pack them in live moss, so they will arrive in A No. 1 condition and please you.

I thank you for your assistance in building up our plant business, which I assure you will mean your success, as well as ours.

Very truly yours,

U. G. HAWK.

We grow our own plants.

NOTICE!

We do not grow all the varieties listed by Different Nurseries. We grow the ones we can honestly recommend as profitable.

Orders for Plants by Parcel Post must have 20c per hundred added to catalog prices.

Payments for orders must be made with the order. No Plants sent C. O. D.

Orders sent by freight are sent at purchaser's risk. We prefer to send all orders by Express.

Don't envy your neighbor. He buys his Plants from the Thoroughgood Strawberry Plant Farm, Salisbury, Md.
